

Steps for ROOT installation in Ubuntu20.04 /18.04

ROOT installation in /opt folder (you choose any location / folder)

```
sudo -s
cd /opt/
mkdir root
cd root/
wget https://root.cern/download/root_v6.22.02.source.tar.gz
tar xzf root_v6.22.02.source.tar.gz
mv root-6.22.02/ 6.22.02
cd 6.22.02/
./configure
mkdir obj
cd obj/
cmake -DCMAKE_INSTALL_PREFIX=/usr/local/root -Dgnuinstall=ON
cmake --build -- -j4
make install
```
