

CONTENTS

1.	ACCELERATOR	1
1.1	Operational Summary	1
1.2	Maintenance and Development Activities	3
1.3	Ion Source Activities	7
1.4	Beam Pulsing System	9
1.5	Development Activities	9
1.6	Installation of 1.7 MV Pelletron Facility at IUAC	10
1.6.1	Installation of RBS facility with 1.7 MV Pelletron	10
1.7	Accelerator Mass Spectrometry (AMS)	11
1.7.1	^{26}Al AMS measurements	11
1.7.2	AMS Chemistry laboratory activities: Anion and cation exchange column calibration	12
2.	ACCELERATOR AUGMENTATION PROGRAM	15
2.1	LINAC	15
2.1.1	Delivery of ion beams from Pelletron and LINAC for Nuclear Physics experiment	15
2.1.2	Role of random phase focusing on the time width of the beam bunch at LINAC exit	16
2.1.3	Use of last accelerating resonators as the re-buncher	17
2.1.4	Status of automation of LINAC operation	17
2.1.5	Superconducting Niobium Resonators	18
2.1.5.1	Performance of Production Resonators	18
2.1.5.2	Low Beta Resonator	19

2.1.5.3	Spoke Resonators	21
2.1.5.4	Single & Multi Cell Cavities	22
2.1.5.5	Facility Upgrade	23
2.2	Cryogenics	23
2.2.1	Cryogenic Facility	24
2.2.2	LINAC Cryomodule	26
2.2.3	Other Development Projects	27
2.2.4	Home Made FPGA Based Instrumentation Development for LINAC Automation at IUAC	30
2.3	RF Electronics	30
2.3.1	Status Report of the Multi-harmonic Buncher and associated jobs	30
2.3.2	Software developments for LINAC control scheme	31
2.4	Beam Transport System	31
2.4.1	New Low Energy Ion Beam Facility	31
2.4.2	Beam Optics of High Current Injector	33
2.4.3	High Voltage Power Supply for saddle field fast atom beam (FAB) source	36
2.4.4	Three channel Linear high voltage (± 2 kV) amplifier for Electrostatic steerer/ scanner	37
2.4.5	Thermoelectric Cooler (TEC) based rapid thermal cycler and Controller	38
2.4.6	Steerer and Quadrupole magnet power supply development for upcoming HCI facility	39
2.5	Low Energy Ion Beam Facility	39
2.5.1	Electron Cyclotron Resonance Ion Source based Low energy Ion Beam Facility	39

2.5.2	High Temperature Superconducting ECRIS-PKDELIS and Low Energy Beam Transport (LEBT)	44
2.6	Status of Drift Tube Linac & RFQ Accelerator	53
2.6.1	Fabrication, Modification and RF testing on Prototype Drift Tube LINAC at IUAC	53
2.6.2	High Power RF Tests on The Modulated Prototype RFQ Accelerator	55
3.	RESEARCH SUPPORT FACILITIES	58
3.1	High Vacuum Laboratory	58
3.1.1.	Installation of Low energy Ion Beam Facility	58
3.2	Maintenance and Servicing of Power Supplies and Magnets	61
3.2.1	Beam transport System	61
3.2.2	Maintenance of power supplies other than BTS	62
3.3	Detector Laboratory	62
3.3.1	Detector system for transfer studies in GPSC	63
3.3.2	Detector setup for HYRA focal plane	64
3.3.3	Detectors for Neutron array	65
3.3.4	Charged particle detectors for slowed down beam campaign at PRESPEC	65
3.3.5	Axial Field annular Ionization Chamber	67
3.3.6	Repair of damaged MWPC in NAND/GPSC	67
3.4	Target Development Laboratory	67
3.5	RF & Electronics Laboratory	70
3.5.1	Multi-channel front end electronics	70

3.5.2	Status of electronics for NAND array at IUAC	71
3.5.3	Development of Time to Amplitude Convertor (TAC)	71
3.5.4	Development of SSB detector electronics module	72
3.5.5	Development of the Multi-harmonic buncher (MHB) for High Current Injector (HCI)	72
3.5.6	High power solid state power amplifier development	72
3.5.7	General Purpose Crate (GPC) for Control Applications	73
3.5.8	VMEDAC64 12-bit 64 Channel DAC for VME bus	74
3.6	Electrical Group Activities	74
3.6.1	Captive Power Installations	74
3.6.2	Voltage Stabilisers	75
3.6.3	UPS Installations	75
3.6.4	Power Factor Compensation	75
3.6.5	Communication Equipments	75
3.6.6	Maintenance of Substation, Power and Lighting Installations of Office Complex and Residential Colony	75
3.6.7	Energy Saving	76
3.6.8	UPS Systems	76
3.6.9	Electrical works for 1.7MV Pelletron	76
3.6.10	Electrical works planned for Helium plant-II (Linde)	77
3.6.11	Electrical Energy management network	77
3.6.12	Electrical Safety	77
3.7	Computer and Communications	78
3.7.1.	High Performance Computing Facility	78

3.7.2	IUAC LAN and servers	80
3.7.3	Data Acquisition System and Hardware development	80
3.8	Air Conditioning, Water System And Cooling Equipments	81
3.9	Mechanical Workshop	83
3.10	Health Physics	85
3.10.1	Radiation shielding door	85
3.10.2	Gamma Chamber	86
3.10.3	Synthesis and characterization of thermoluminescent $\text{Li}_2\text{B}_4\text{O}_7$ nanophosphor	87
3.10.4	Thermoluminescence of Nanocrystalline $\text{K}_3\text{Na}(\text{SO}_4)_2$: Eu Irradiated With 75 MeV C^{6+} Ions	88
3.10.5	Luminescence characteristics of $\text{Ca}_{1-x}\text{Sr}_x\text{S}:\text{Ce}$ nanophosphors	88
3.10.6	Synthesis and Characterization of doped Sulfide Nanoparticles	89
3.10.7	Thermoluminescence response of $\text{CaS}:\text{Bi}^{3+}$ nanophosphor exposed to 200 MeV Ag^{+15} ion beam	90
3.10.8	Radon & Thoron evaluation & analysis in water, soil and in environment using RAD7	90
3.10.9	An attempt to use polyaniline and conducting polymers as neutron sensor	91
3.10.10	Synthesis and Characterization of ZnO Nano Particles	92
3.10.11	Experimental Condition induced variation in Texture coefficient of Crystal Planes in Cu and Ni nanostructures	93
3.10.12	Study of optical and structural properties of CR-39 and PET polymers irradiated by 55 MeV C^{5+} ions	93
3.10.13	Bulk etch rate estimation of LR-115 SSNTD using PHOENIX interface	94

3.10.14	Contribution of TENORM towards indoor radioactivity	95
3.10.15	Estimation of radioactivity in tobacco	96
3.11	Civil Works	97
3.12	Compressed Air System and Material Handling Equipments	98
3.13	Data Support Laboratory	99
3.13.1	Fabrication of Current Integrators	99
3.13.2	Fabrication of 4-Channel Tesla Meter Readout CAMAC Module	100
3.13.3	Design and Development of FPGA based Serial ADC with histogram CAMAC Module	100
3.13.4	Fabrication of 2-Channel Fast Rate Divider modules	101
3.13.5	Fabrication of Gate & Delay Generator modules	101
3.13.6	Servicing and Maintenance	102
4.	EXPERIMENTAL FACILITIES IN BEAM HALL	103
4.1	General Purpose Scattering Chamber (GPSC) & Neutron Array Facility (NAND)	103
4.1.1	Novel Method for Neutron TOF Data Analysis	103
4.2	Gamma Detector Array Facilities	106
4.2.1	Indian National Gamma Array (INGA)	106
4.2.2	New Recoil Distance Device for Indian National Gamma Array	106
4.2.3	Detector Maintenance	108
4.2.4	Nuclear Physics using LINAC	108
4.2.5	Experiments using GDA related facilities	108

4.3	Recoil Mass Spectrometers	109
4.3.1	Heavy Ion Reaction Analyzer (HIRA)	109
4.3.2	HYbrid Recoil mass Analyzer (HYRA)	109
4.4	Materials Science Facility	113
4.4.1	Irradiation chamber maintenance	114
4.4.2	Scanning Probe Microscope	114
4.4.3	In-situ X-ray Diffractometer setup	114
4.5	Radiation Biology Facility	118
4.5.1	Status of the Molecular Radiation Biology Laboratory	118
4.6	Atomic Physics Facility	119
5.	RESEARCH ACTIVITIES	120
5.1	NUCLEAR PHYSICS	120
5.1.1	Role of shell closure on nuclear dissipation using neutron as a probe	121
5.1.2	Measurements of one and two proton transfer reactions for $^{28}\text{Si}+^{90,94}\text{Zr}$ systems	124
5.1.3	Fission fragment mass distribution measurement for the reaction $^{19}\text{F}+^{184}\text{W}$	127
5.1.4	Investigation of fission reaction dynamics and neutron multiplicity for the $^{16}\text{O}+^{204,206,208}\text{Pb}$ systems	129
5.1.5	Effect of projectile breakup on fission in $^{6,7}\text{Li}+^{238}\text{U}$	132
5.1.6	Role of N/Z in the Pre-Scission Neutron Multiplicities for the $^{16,18}\text{O}+^{194,198}\text{Pt}$ Systems	134
5.1.7	Enhanced $0^+_{\text{gs}} \rightarrow 2^+_1$ transition strength in $^{112,114}\text{Sn}$	137
5.1.8	How does projectile structure affect incomplete fusion? The case of $^{14}\text{N}+^{169}\text{Tm}$	139

5.1.9	Development of a set up to measure g factor of a nucleus using transient field technique	142
5.1.10	Exclusive Measurements of GDR Decay from Hot Excited ^{196}Hg	144
5.1.11	Effects of Neutron Shell Closure in Fission Dynamics	146
5.2.12	Spin distribution measurement in fusion reaction $^{30}\text{Si}+^{170}\text{Er}$	150
5.1.13	Measurement of neutron emission during 50 keV deuterium implantation in CaO-Pd-CaO multilayer samples	152
5.1.14	A study of incomplete fusion reaction dynamics in $^{12}\text{C} + ^{159}\text{Tb}$ system at $\approx 4\text{-}7$ MeV/A	154
5.1.15	Study of fission fragment mass distributions for the compound nucleus ^{215}Fr	156
5.1.16	Lifetime Measurements in Nuclei of Mass 125 Region	158
5.1.17	Investigation of tetrahedral symmetry in nuclei	161
5.2	MATERIALS SCIENCE	164
5.2.1	The effects of Ni and Mg ₂ Ni interlayer on hydrogenation properties of Pd sandwiched Mg films	165
5.2.2	Hydrogen absorption study of Pd/Mg thin films using elastic recoil detection analysis with 120 MeV $^{107}\text{Ag}^{+9}$ ions	167
5.2.3	Study of the structural modifications induced by ion irradiation in Pd-SiO ₂ nanocomposite using insitu X-ray diffractometer	169
5.2.4	Origin of swift heavy ion induced stress in textured ZnO thin films: An <i>in situ</i> X-ray diffraction study	170
5.2.5	An <i>in situ</i> X-ray diffraction study of 120 MeV Au ion irradiation induced modification of microstructure in NiO thin film	171
5.2.6	Ion beam–induced shaping of Ni nanoparticles embedded in a silica matrix: From spherical to prorated shape	172

5.2.7	Modifications of Si-nanostructures embedded in Si- α -SiN _x : H film by Swift heavy ion irradiation	174
5.2.8	Structural modifications of Carbon nanotubes by irradiation of Carbon, Nickel and Gold ion beam	175
5.2.9	Photoluminescence Properties of SHI irradiated ZnO/PMMA nanocomposites	177
5.2.10	Swift heavy ions induced structural phase transition in ZnS nanocrystalline thin films	179
5.2.11	Synthesis of Au Nanoparticles at the Surface and Embedded in Carbonaceous Matrix by 150 keV Ar Ion Irradiation	181
5.2.12	Energy dependence studies of surface nanostructures on InP(100) using energetic ion bombardment	183
5.2.13	Effect on Optical Properties of Silver/PVA Nanocomposites Influenced by High Energy Ion Beam Irradiation	184
5.2.14	The effect of Ag ¹⁶⁺ SHI irradiation on the Strontium hexaferrite nanoparticles	186
5.2.15	Swift Heavy Ion Induced Effects on PEO based Polymer Nano Composite Electrolytes	188
5.2.16	Magnetic transition in Co doped ZnS thin films by 120 MeV Ag ion irradiation	190
5.2.17	Ni ⁷⁺ ion irradiation effect on thermally oxidized ZnO and In ₂ O ₃ films	191
5.2.18	PEC Study on 100 MeV Si ⁸⁺ Ion Irradiated Nanostructured Fe ₂ O ₃ /TiO ₂ bilayered Thin Films	193
5.2.19	200 MeV Ag ion irradiation effect on Ce doped nickel ferrite nanoparticles	194
5.2.20	Evolution of surface topography of gold thin films by MeV Ni ion bombardment	195

5.2.21	Analysis of light and heavy ion irradiated Gallium Nitride epilayers grown using MOCVD Technique	196
5.2.22	Swift Heavy Ion Irradiation induced Surface Evolution of TiO ₂ thin films	198
5.2.23	Swift heavy ion induced modification of Gallium Phosphide surface	199
5.2.24	100 MeV Ag ion irradiation on tin oxide thin films	201
5.2.25	Investigation of H/He Implantation-Induced Damage in AlN and InP	202
5.2.26	SHI irradiation effects on properties of manganite based thin film devices	203
5.2.27	Effect of 150 MeV Ag ¹²⁺ ion beam irradiation on SBN thin films.	204
5.2.28	Effect of SHI Irradiation on Critical Current Density of Y _{1-x} Ca _x Ba ₂ Cu ₃ O _{7-δ} Thick Film with Y ₂ O ₃ Composite	206
5.2.29	Morphological and Photoelectrochemical Properties of 100MeV Si ⁸⁺ Ion irradiated Electrodeposited Iron Oxide Thin Films	207
5.2.30	Swift heavy ions beam induced modifications in thin films of Ba(Fe _{0.5} Nb _{0.5})O ₃ (BFN) relaxor dielectrics	208
5.2.31	AC Conduction and Dielectric Relaxation in Polypyrrole Irradiated with SHI of Ag ⁸⁺	210
5.2.32	Effect of Ar ion implantation on structural and optical properties of WO ₃ thin films	211
5.2.33	Corrosion study of surface modified Ti by ion implantation in stimulated body fluid	212
5.2.34	140 MeV Silicon Ion Irradiation Effects on the I-V Characteristics of NPN RF Power Transistors	213

5.2.35	The effect of 140 MeV Silicon Ion Irradiation on Subthreshold and Transconductance Characteristics of N-channel Depletion MOSFETs	214
5.2.36	Assessment of 50 GHz SiGe HBTs for Harsh Radiation Environment by Heavy Ion Irradiation	215
5.2.37	Performance of Photoanode in CdSe-sensitized solar cells with nitrogen implanted TiO ₂ mesoporous electrodes	217
5.3	RADIATION BIOLOGY	220
5.3.1	RBE evaluation in Human cervical cancer cell line exposed to Gamma radiation and Carbon Beam (LET 290 KeV/ μ m)	220
5.3.2	Study of Radiosensitivity of Human Cervical Cancer cell line on treatment with Glucose stabilized Gold Nanoparticle	222
5.3.3	Surface Enhanced Raman Spectroscopy (SERS) Study of Human Cervical Cancer and Lung Cancer Cell Line	224
5.4	ATOMIC PHYSICS	227
5.4.1	Formation of fully stripped ions in multi-nucleon transfer reaction and the study of the reaction $^{56}\text{Fe}, ^{58}\text{Ni} (^{12}\text{C}, \alpha\alpha)$	227
5.4.2	L x-ray production cross sections for high-Z elements by F ^{+6,7,8} ions	230
5.4.3	L sub-shell ionization for high Z elements by Si ^{+8,12} ions	232
6.	ACADEMIC ACTIVITIES	235
6.1	Pelletron Beam Utilization By Users	
6.1.1	Pelletron Beam Time Utilization and Experiments Performed (April 2010 - March 2011)	235
6.1.2	List of Users Family	236

6.2	M. Sc. Orientation Programme	243
6.3	Library	243
6.4	PhD Teaching Programme	244
6.5	Academic Activities In 2010-11	245
6.6	Forthcoming Events: 2011	246
6.7	List of Seminars Conducted In The Year 2010-11	247
6.8	List of Publications (2010-2011)	250
6.9	List Of Technical Reports /Technical Memos (2010-11)	258
6.10	Teaching Lab Activities	260
APPENDIX – I COMMITTEES		261
APPENDIX – II IUAC PERSONNEL		267
APPENDIX - III List of Users		270
